Subject: RE: SANRAL's Proposed capacity improvements to N2 and N3

Good Day Mr Logan

Thank you for your query. The original design for proposed upgrades to the N3/Richmond Road Interchange stopped short of 54 Richmond Road.

However, SANRAL and their appointed design engineers are currently looking at modifications to the design, due to the need to ensure that access to all surrounding properties near the interchange is properly accommodated. This will change the proposed footprint.

Unfortunately we are unable to confirm at this stage how your property may or may not be affected as nothing is finalised. As soon as the designs are confirmed, you will be notified directly by the engineers if your property will be affected. As part of the environmental assessment process, ACER will be notifying the public of proposed changes, when they are available - probably during early 2018.

Kind Regards,

Mareike Straeuli

Subject: SANRAL's Proposed capacity improvements to N2 and N3

Good day

I refer to the above correspondence dated 11 December 2017.

My enquiry is. I reside at 54 Richmond Road, Ashley in Pinetown, and have noted that core samples have been taken by a private company, at the intersection of Richmond Road and Mariannahill Road. On enquiry from the supervisor he advised me that these samples were taken for the planning of a concrete bridge at this intersection, but could offer no further information. I am not sure if this is in connection with the above correspondence.

As a concerned resident I would like to know if these samples taken are in connection with the proposed changes for N2 N3, or could you direct me to the appropriate authorities who could assist me.

I look forward to your reply.

Thank you

Mr A.F. Logan
