Subject: RE: FW: SANRALS proposed widening of the N2 and N3 in Durban area (affecting area around Giba Gorge)

Categories: Added/Saved

Thank you Chris, we will add you to the project database.

It is probable that you have already had correspondence with the engineers. However, if you have any issues or concerns that you would like dealt with via the environmental impact assessment process, please send them directly to ACER.

Many thanks and kind regards, Ashleigh

Ashleigh

Thanks for your email. Please can you add me to the register as an I & AP for this contract? If you have any further queries, please come back to me?

Thanks
Chris

Good Day Fiona

ACER Environmental Consultants would like to notify you of the environmental authorisation process that has commenced for SANRAL's proposed widening of the N2 between Solomon Mahlangu and Umgeni interchanges, and the N3 between EB Cloete and Key Ridge interchanges. These roads are currently at full capacity and SANRAL plans to provide additional lanes and upgraded interchanges to cater for the next 30 years. (See attached Background Information Document).

Of particular note for Giba is the proposed widening of the Umhlatuzana Viaduct on the N3, which requires access to the bottom of the bridge (see attached illustration of proposed access).

A Comment Sheet is attached, should you like to register with the project and receive further information over the course of the environmental assessment process.

Please also note that a **Public Open Day is being held on Tuesday 16th August at the Westville Country Club (open to visitors between 3 and 7 pm)**. It is part of the environmental authorisation application process and provides an opportunity for interested parties to obtain detailed information and a chance to speak to directly with the design engineers and SANRAL representatives.

Please could you forward this to any other organisations and persons that may be interested.

Thank you and kind regards

Ashleigh McKenzie
