Good Morning Jason

Thank you for your call yesterday. While ACER ran a comprehensive title deeds search to identify adjacent landowners, there were not always up to date contact details available and it appears that you are not registered on the project database. We would like to add you now and you will receive relevant information going forward, with regard to the application for environmental authorisation.

Please also find attached, which we trust will be of assistance:

- A general image of where your property is located in relation to the proposed project.
- A zoomed in Google earth image which shows, according to our information, that the widening will use up the full road reserve up to the boundary of your property but will not encroach onto your property. SANRAL's land acquisition team would have contacted you last year if SANRAL needed to purchase any portion of your property. We are, however, double checking with the engineers to confirm this.
- A Background Information Document and comment sheet. Please fill out the registration details on the attached letter and email them back to me so that we can add you to the database. You can also still submit any written comments to me and I will pass them onto the project manager. Please disregard any deadline dates for comment on the attached documents.

Please feel free to contact us for further information.

Kind regards,

**Mareike Straeuli**
