Dear Charlene

1. Please register me as an Interested and Affected Party (I&AP)
2. Please provide Basic Assessments (BA) on: a) BA1: YES and b) BA2: YES.
3. Please include the following as part of the Assessment:

Please see a typical example below. Having witnessed and recorded the devastating effects that diverted and concentrated surface and channelled storm water has on water quality, peak and base flow in streams, wetlands and rivers, please have measures put in place to ensure storm-water neutrality (measures to reinstate the pre-development ecological, environmental and hydrological conditions); including retro-engineering for the existing road corridor and surrounds, so as to sustain biodiversity of the aquatic, riparian and terrestrial habitats; even artificially replicating nature where necessary; for perpetuity.

Regards
Lee
