2. Please consider the following issues as part of the Assessment: (Please use extra sheets if needed)

Health care studies on vehicle air pollution, has found that children living within 500 metres radius of major roads / freeways are at greater risk of developing asthma, and impair lung function in adults which could result in cardiovascular illness and even death.

Noise pollution is another great concern as we have the right of freedom in our homes. We have the right to choose what we want to listen to, we have the right to have a peaceful sleep when we want to. The residence living next to the N3 will be stripped of their rights to privacy.

I suggest that the following stakeholders also be involved in the process:
