

Cameron Christian 18 Harcourt Road, Scottsville Pietermaritzburg, 3201. 079 494 5987

The following refers to the project BA6.

I would like a study of impacts of the current and proposed activity on the environment. There would have to be current study vs proposed environmental dynamics.

I would appreciate an understanding on the following as a comparison between current vs projected

1. The criteria used for sourcing the current environmental ACER. What selection process was used here? Proof thereof to be supplied.
2. Noise/Sound impact study. Current vs Projected
3. Emissions and Pollutants Current vs Projected
4. The lack of Maintenance from Sanral on the Blackborough Spruit from Blackborough Road to the N3 into Mills Circle. The potential to re-inforce and clear and clean this out.
5. The Current Lack of Security infrastructure vs Projected to be incurred
6. Current Study of Traffic Volume N3
7. Where would be the actual Site Camps and stockpile camps be?
8. Your morale stance on the impact of environment vs Health
9. Accidents stats of heavy vehicle vs light motor between Market and Orthman Road.
10. Projected Geometrical distance between N3 and New England including the service. This needs to be critically included in the studies above.

I am still awaiting the Land Ownership details. My details were taken down by one of your engineers at your open day on the 30 May 2018 at Maritzburg Golf Club.

Trusting that you will find this in order.

Thanks
