Subject: Equiano Cable System - Melkbosstrand

Hi Basson

Thank you for meeting with me last week to discuss the proposed Equiano Cable System which will be landed at Melkbosstrand and then feed into the existing SAT-2 Beach Man Hole located on the beach at Melkbosstrand.

I have searched both the provincial and national environmental departments websites and see that land owner notification forms are no longer available on their websites so I am not sure if these forms have been withdrawn and are no longer a requirement for submission with the EIA documents.

Irrespective of the above, please could I ask that you respond to this email just stating that the EAP has engaged with the Department of Public Works (DPW) and that you as a landowner are aware of the project and will be kept informed throughout the EIA process.

Regards
Giles
